CHALLENGE & SOLUTION

THE CHALLENGE — Why Teams Struggled

No Clear Visibility

Team members could not easily see project progress, timelines, or delays in real time.

Resource Management Issues

It was difficult to know who was available, busy, or overloaded because information was maintained in spreadsheets.

Manual Reporting

Project status reports were prepared manually, which took time and often led to errors.

Missed Deadlines

Task delays were not tracked properly, causing some activities to miss their planned deadlines.

THE SOLUTION — ProManage 360

Live Dashboard

A real-time dashboard provides instant visibility of project status, progress, and key metrics.

Resource Planning

Visual resource allocation helps managers quickly identify available, busy, and overloaded team members.

Smart Analytics

Built-in analytics track project efficiency, delays, DVP status, and on-time delivery performance.

Security & Audit Tracking

Role-based access, user activity logs, and audit trails ensure data security and accountability.

CORE FEATURES

Live Dashboard

Real-time status cards, interactive charts & smart date-range filters (weekly / monthly / quarterly) across all teams and platforms.

Resource Gantt Chart

Visual timeline showing busy vs. available engineers, overdue tasks, and a live 'today' marker — know who has capacity instantly.

Multi-Chart Analytics

Team drilldown, engineer vs. projects, on-time vs. delayed, DVP status charts — with breadcrumb navigation at every level.

Smart Filtering

Filter by Manager, Lead, Engineer, Project, Platform, and any date range to slice data exactly how your team needs it.

Centralized Database

MySQL-backed single source of truth for projects, engineers, roles, aggregates, and immutable audit trails.

Audit & Access Control

Role-based permissions for every stakeholder, full session tracking, and zero unauthorized access — security baked in.

Resource Visibility & Analytics Intelligence

Live Dashboard · Role-Based Access Control · Measurable Business Impact

ProManage 360 transforms manual project tracking into a centralized, real-time digital platform that improves visibility, resource planning, reporting, and project delivery performance.

DESIGNED FOR EVERY STAKEHOLDER

Admin

- Full system access
- Manage all records
- Upload & bulk edit
- All dashboards
- Audit logs & sessions

Manager

- Team oversight
- Monitor delays & status
- Resource availability
- Efficiency reports
- View team performance

Lead

- Project coordination
- Assign engineers
- Track progress
- View Gantt timeline
- Lead efficiency charts

Engineer

- Task execution
- View own assignments
- Update task status
- Check deadlines
- Personal dashboard
